Create App

An app is a collection of items that work together to serve a particular function. In Lightning Experience, Lightning apps give your users access to sets of objects, tabs, and other items all in one convenient bundle in the navigation bar. Lightning apps let you brand your apps with a custom color and logo. You can even include a utility bar and Lightning page tabs in your Lightning app. Members of your org can work more efficiently by easily switching between apps.

Classic apps are a collection of standard and custom tabs, including:

- Most standard objects, including Home, the main Chatter feed, Groups, and People
- Your org's custom objects
- Visualforce tabs
- Lightning component tabs
- Canvas apps via Visualforce tabs
- Web tabs

Create The Lightning App

1.Go to the Gear Icon ? Click on setup ? click on the Home Button ? Go to the quick find box and select the App Manager

Lightning Experience App Manager

Clone Apps (Beta)

Quickly create new Lightning apps by cloning existing apps. To use the beta feature, indicate that you've read all legal requirements and agree to participate by toggling Enable App Cloning. See additional details and terms in the [Winter '23 Release notes](#).

Enable App Cloning: ☐ Disabled

App Name	Developer Name	Description	Last Modified	App Type	VL
1 All Tabs	AllTabSet		04/12/2022, 10:13 am	Classic

4. To Add Navigation Items: Select the items from the search bar and move it using the arrow button ? Next. select all the tabs which you have created

5. To Add User Profiles: Search profiles in search bar ? click on the arrow button & select Standard user, standard Platform user & System Admin Profile? save & finish.

New Lightning App

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.
